

# Isiaka Olakunle Salau

## M.S. Student, Animal Science, UC Davis

(530)302-6054 · iosalau@ucdavis.edu  
2324 Shasta Dr Davis California, 95616

---

### PROFESSIONAL SUMMARY

Graduate student in Animal Science with hands-on experience in laboratory research, data analysis, and computational biology. Skilled in mentoring students, teaching laboratory techniques, automating data workflows, and applying programming tools to biological datasets. Strong software engineering background with expertise in Python, C, Bash, SQL, and full-stack development

---

### KEY COMPETENCIES

**Laboratory & Teaching:** Experimental design, animal handling, plant/animal data collection, mentoring undergraduates, instructional support

**Professional Skills:** Process optimization, report writing and presenting, critical thinking, collaborative teamwork, proactive and self-motivated, exceptional organizational skills

**Technical & Software Skills:** Python, C, JavaScript, Bash scripting, SQL/MySQL/MongoDB, Flask, React, Redis, Machine Learning, Automation, Data Analysis

---

### PROFESSIONAL EXPERIENCE

#### Olabisi Onabanjo Teaching and Research Farms Research Assistant

2019 - 2023

- Conducted animal production experiments, including chicks brooding, irrigation techniques, and plantain plantation management.
- Collected, organized, and analyzed experimental data using Python and Excel.
- Assisted undergraduate students in laboratory techniques, experimental protocols, and data analysis.

#### ALX Africa

##### Technical Mentor

2023 - 2024

- Mentored peers in coding challenges, debugging, and project development.
- Built full-stack applications, automated data workflows, and applied machine learning for data-driven solutions.
- Developed scripts for data collection, web scraping, and experimental data processing.

### PROJECT EXAMPLES

- Developed a Python-based workflow for automating data ingestion and error reporting for biological datasets.
- Built a web scraping tool to collect experimental or pricing data and export results to Excel for analysis.
- Created full-stack applications (Flask + React + SQL/NoSQL databases) to streamline data collection and reporting.
- Automated repetitive tasks and developed scripts to process large datasets efficiently.

## PEER MENTOR / TEACHING EXPERIENCE

- Guided undergraduate students in laboratory and animal science courses.
- Led small group sessions, explained complex biological and computational concepts, and helped students troubleshoot experiments and coding projects.

## SELECTED TECHNICAL PROJECTS

- Unix Shell & Monty Bytecode Interpreter: Developed command-line tools for scripting and automation.
- iAmReady Full-Stack Web App: PostgreSQL database, Flask RESTful API backend, React frontend, automated user workflows.
- Email Threat Detection ML Model: Applied Python-based machine learning for classification of structured data.
- Web Scraping Automation: Scraped Excel-based datasets and generated downloadable results.

---

## EDUCATION

|                                                                             |             |
|-----------------------------------------------------------------------------|-------------|
| M.S. Animal Science, University of California, Davis                        | Present     |
| B.Sc. Agricultural Science (Animal Production), Olabisi Onabanjo University | 2017 - 2023 |

## CERTIFICATIONS

- Python for Genomic Data Science
- Algorithms for DNA Sequencing
- ALX Africa Full Stack Software Engineering
