Relevant Coursework: Financial Accounting, Corporate Finance, Valuation, Investment Analysis, Financial Modeling, Managerial Economics

University of California, Santa CruzBachelor of Arts, Macro-World History — June 2007

EXPERIENCE**Simply Bee Farms — California***Founder & Strategic Advisor* | 2023 – Present

- Designed a carbon-backed digital asset framework linking verified tree planting, composting, and regenerative agriculture to measurable carbon sequestration outcomes.
- Built measurement, reporting, and verification (MRV) logic to support asset-backed token issuance aligned with ESG finance and environmental credit markets.
- Modeled revenue streams from carbon credits, verification fees, and enterprise infrastructure, emphasizing recurring monetization over speculative value.
- Prepared summary financial materials for external stakeholders, synthesizing operating performance, growth drivers, and risk factors while managing multiple concurrent financial workstreams under tight timelines.
- Positioned platform for ESG banking, sustainable finance, and infrastructure-linked capital deployment aligned with evolving carbon market regulation and institutional ESG reporting standards.
- Analyzed implied enterprise value using EBITDA and revenue multiples to benchmark performance against comparable consumer and food businesses.

ESG & SUSTAINABLE FINANCE EXPERIENCE

- Carbon credit economics and pricing fundamentals
- Asset-backed token design (non-speculative, verification-driven)
- ESG data integrity, MRV systems, and auditability
- Climate-linked infrastructure and nature-based solutions
- Sustainable agriculture finance and regenerative asset valuation

Prism Organic Juicery LLC — Los Angeles, CA*Founder & Chief Executive Officer* | Dec 2015 – 2023

- Founded and operated a vertically integrated consumer products company with \$250K+ in deployed assets, managing full P&L, budgeting, and cash flow forecasting.
- Built Excel-based unit economics, contribution margin, and break-even models to support capital allocation and expansion decisions, achieving ~80% gross margins through supplier negotiation and cost optimization.
- Developed multi-year operating and cash flow projections to evaluate expansion scenarios, capital expenditures, and return on invested capital.
- Led investor outreach and prepared financial summaries, growth narratives, and diligence materials for sustainability-linked expansion initiatives.
- Structured farm-to-market partnerships to improve asset utilization, reduce cost of goods sold, and enhance EBITDA profile.
- Evaluated downside, base, and upside scenarios to assess capital risk and return profiles.

Bilalian Halal Association (Nonprofit) — Los Angeles, CA*Co-Founder* | Aug 2013 – 2023

- Co-founded and scaled a national certification organization, overseeing budgeting, revenue diversification, and long-term financial sustainability strategy.
- Developed funding models across grants, memberships, and partnerships, improving predictability of cash inflows.
- Coordinated stakeholder negotiations with farms, manufacturers, and institutions, expanding network scale and enterprise credibility.

Coachella Valley High School — Thermal, CA*Agriculture & Finance Program Lead (CTE)* | May 2023 – June 2025

- Managed a closed-loop agricultural operation, tracking costs, outputs, waste reduction, and operational efficiency metrics.
 - Secured \$5MM+ in grant funding, preparing budgets, financial narratives, and compliance documentation.
 - Partnered with universities, farms, and public agencies on program financing and execution.
-

Davis, CA | [linkedin.com/in/ata-nabawi](https://www.linkedin.com/in/ata-nabawi) | amnabawi@ucdavis.edu | (714) 305-7357

Chief Development Officer

EXECUTIVE PROFILE

Mission-driven and innovative visionary and leader with 15+ years of experience in education, agriculture, and social enterprise development, bridging public, private, and nonprofit sectors to drive sustainable growth. Proven success in fund development, external partnerships, community engagement, and strategic communications. Founder of multiple impact-driven organizations advancing climate-smart agriculture, workforce development, food equity, and education. Multilingual with expertise in multicultural communication and a track record of mobilizing diverse stakeholders toward shared goals.

EXECUTIVE & ENTREPRENEURIAL LEADERSHIP

Founder & Chief Executive Officer

Prism Organic Juicery LLC — Los Angeles, CA | *Dec 2015 – Present*

- Built and managed a vertically integrated, climate-smart beverage company connecting urban orchards to local markets. Developed farm-to-bottle supply chain and product strategy, achieving 80% profit margins and managing \$250K in assets.
- Cultivated community partnerships and donor relationships supporting sustainable sourcing and workforce training. Launched brand campaigns that generated thousands of loyal customers and increased local awareness of sustainable food systems.
- Spearheaded environmental storytelling and investor outreach for future expansion into carbon-financed agricultural projects. Currently integrating operations with nonprofit farm and education initiatives to scale impact.

Co-Founder

Bilalian Halal Association (Food Certification Nonprofit) — Los Angeles, CA | *Aug 2013 – Present*

- Established the first national grassroots halal food certification networks, a nonprofit focused on ethical food certification, community, and sustainable food systems.
- Partnered with thousands of local farms, restaurants, and faith communities to enhance food transparency and safety standards.
- Coordinated interfaith dialogues and stakeholder meetings to expand brand visibility and secure funding. Currently restructuring to launch nationwide recruitment and operations at both the executive and grassroots levels.

EDUCATION LEADERSHIP & PUBLIC ENGAGEMENT

Agriculture Teacher in Career & Technical Education (CTE)

Coachella Valley High School — Thermal, CA | *May 2023 – June 2025*

- Developed and led an agriculture program that included a **closed-loop farm system**, composting two tons of organic waste per year while producing fresh produce for the school cafeteria.
- Mentored the Coachella Valley Future Farmers of America (FFA) chapter, sending hundreds of students to college or industry positions.
- Secured \$5 million in grant funding for agricultural and natural resource initiatives.
- Built strategic partnerships with local universities, farms, and civic groups to expand student work and hands-on learning opportunities.

Math & Humanities Educator — *Various Schools, 2008–2023*

Compton Unified School District | Islah Academy | Premier Educational Staffing | Grace Hopper STEM Academy — Greater Los Angeles Area

- Taught mathematics, history, and English across public, private, and charter schools serving thousands of underrepresented youth.
- Developed inclusive curricula blending humanities and STEM through culturally responsive teaching.
- Mentored hundreds of students in inner-city schools, promoting college access, career pathways, and civic engagement.
- Partnered with community-based organizations to provide enrichment programs and mentorship opportunities.
- Advocated for equitable education and youth empowerment through hands on-learning and project-based instruction.

CDO Cover Letter

October 7, 2025

National Education Equity Lab
Chief External Affairs and Development Officer
Cover Letter

Dear Hiring Committee,

Education is arguably the greatest change agent.

As someone who began his journey as a troubled inner-city youth, I know first-hand the power of education to transform the trajectory of a life. As a high school sophomore, I made the decision to change my path through learning—and that single decision has shaped my journey. I was the first in my family to attend college, inspiring my siblings and even my mother to earn their bachelor's degrees. Since then, I've devoted my life to being a lifelong learner and educator, driven by one belief: when we invest in people, believe in them, and refuse to give up on them, they rise.

That belief has guided my career as an educator, entrepreneur, and advocate for equity. I have taught in public, private, and charter schools—including Compton Unified, Grace Hopper STEM Academy, and Coachella Valley High School—mentoring hundreds of students, helping them envision and achieve college and career pathways. In every classroom, I have sought to combine rigorous instruction with project-based hands on learning and civic engagement, connecting students to real-world problems and preparing them for success beyond high school.

As a Career and Technical Education teacher, I designed climate-smart agriculture programs that allowed students to engage with hands-on projects while earning articulated, college-level credit. I have seen firsthand the transformative power of high school students succeeding in college courses. Their confidence grows, aspirations expand, and new opportunities emerge. By connecting curriculum to community-based projects such as closed-loop campus food systems, compost programs, livestock management, internships, and environmental restoration projects, I have built pathways for students to see the real-world relevance of their learning.

Beyond the classroom, I have founded and grown mission-driven organizations that bridge education, community, and sustainability. As the founder of Prism Organic Juicery LLC, I oversaw farm-to-bottle operations, product development, and local community engagement. As cofounder of the Bilalian Halal Association, I helped build a nonprofit organization focused on ethical food systems and am currently leading its restructuring to launch nationwide recruitment and operations at both executive and grassroots levels. These experiences strengthened my expertise in grant writing, partnership development, strategic communications, program design, and organizational leadership, skills directly relevant to advancing external affairs and development initiatives at National Education Equity Lab.

My passion for advancing equity through education has also led me to study transformative models in education. From Geoffrey Canada's cradle-to-college approach, which demonstrates the power of a comprehensive community-based strategy, to Sal Khan's vision of universal access to high-quality learning through technology, I have explored ways to even the playing

field for social mobility, opportunity, and generational wealth. I engage across sectors, education, agriculture, and business, because real-world solutions are interdisciplinary in nature, and students benefit most when their learning impacts the real world.

What energizes me most about NEEL is your model of connecting high schools with top universities via credit-bearing courses. This creates a model for equity and upward mobility that can be scaled. I am eager to bring my experience in CTE instruction, cross-sector program development, coalition-building, and strategic fundraising to help NEEL expand its impact, engage new partners, and secure resources that allow more students to experience the transformative power of education.

Thank you for considering my application. I welcome the opportunity to discuss how my background and experience in equitable education align with NEEL's mission to democratize college access for students nationwide.

With appreciation and enthusiasm,
Ata Nabawi

Hiring Committee

University of California, Davis

Division of Student Affairs

Dear Hiring Committee,

I am writing to apply for the **Facilities Management Specialist (FAC MGT SPEC 2 CX)** position within the Division of Student Affairs. With more than a decade of experience in **agriculture, operations, and education**, I bring a rare blend of hands-on technical ability, leadership in student supervision, and a commitment to sustainability—all of which align with UC Davis's values of stewardship, excellence, and learning by doing.

As an **Agriculture Teacher at Coachella Valley High School**, I managed a 10-acre living classroom that required daily oversight of facilities, safety protocols, and maintenance logistics. I led the creation of a **closed-loop farm system**—building composting infrastructure, coordinating waste management partnerships, and repurposing organic materials into productive soil. These projects demanded constant evaluation of tools, systems, and workflow—skills directly aligned with UC Davis's operational and safety standards.

In parallel, as **Founder of Prism Organic Juicery**, I oversaw all operational systems from procurement to equipment upkeep, scaling the company to \$250,000 in managed assets. I developed vendor relationships, optimized resource use, and built high-functioning teams around clear project goals—skills mirrored in facilities coordination and student staff supervision.

My approach to maintenance and operations is both **technical and educational**: I believe every maintenance process is an opportunity to teach safety, responsibility, and efficiency. I hold certifications in **Lean Six Sigma, Project Management Professional (PMP), and Agile systems**, and I am fluent in multiple languages, allowing me to communicate effectively with diverse campus teams and vendors.

UC Davis's emphasis on sustainability and student engagement resonates deeply with my background. I would be honored to contribute to maintaining safe, efficient, and inspiring campus facilities that support student success and environmental responsibility.

Thank you for considering my application. I would welcome the opportunity to discuss how my experience and approach to sustainable operations can strengthen UC Davis's facilities and student programs.

Warm regards,

Ata Nabawi

IB Analyst #2

INVESTMENT BANKING ANALYST CANDIDATE

EDUCATION

University of California, Davis – Graduate School of Management

Master of Business Administration (MBA), Food & Agribusiness Finance (STEM-aligned) — *Expected 2027*

Relevant Coursework: Financial Accounting, Corporate Finance, Valuation, Investment Analysis, Financial Modeling, Managerial Economics

University of California, Santa Cruz

Bachelor of Arts, Macro-World History — June 2007

EXPERIENCE

Simply Bee Farms — California

Founder & Strategic Advisor | 2023 – Present

- Designed a **carbon-backed digital asset framework** linking verified tree planting, composting, and regenerative agriculture to **measurable carbon sequestration outcomes**.
- Built **measurement, reporting, and verification (MRV) logic** to support asset-backed token issuance aligned with ESG finance and environmental credit markets.
- Modeled revenue flows from **carbon credits, verification fees, and enterprise infrastructure**, emphasizing monetization over speculation.
- Prepared summary financial materials for external stakeholders, synthesizing operating performance, growth drivers, and risk factors; managed multiple concurrent financial workstreams under tight timelines, coordinating analysis, stakeholder communication, and deliverables.
- Positioned platform for **ESG banking, sustainable finance, and infrastructure-linked capital deployment** aligned with emerging carbon market regulation and institutional ESG reporting standards.
- Analyzed implied enterprise value using EBITDA and revenue multiples to benchmark business performance against comparable consumer and food businesses.

ESG & SUSTAINABLE FINANCE EXPERIENCE

- Carbon credit economics and pricing fundamentals
 - Asset-backed token design (non-speculative, verification-driven)
 - ESG data integrity, MRV systems, and auditability
 - Climate-linked infrastructure and nature-based solutions
 - Sustainable agriculture finance and regenerative asset valuation
-

Prism Organic Juicery LLC — Los Angeles, CA

Founder & CEO | Dec 2015 – 2023

- Founded and operated a vertically integrated consumer products company with **\$250K+ in deployed assets**, managing full **P&L, budgeting, and cash flow forecasting**.
 - Built Excel-based unit economics, contribution margin, and break-even models to support capital allocation and expansion decisions, achieving **~80% gross margins** through supplier negotiation and cost optimization.
 - Developed **multi-year operating and cash flow projections** to evaluate expansion scenarios, capital expenditures, and return on invested capital.
 - Led investor outreach and prepared **financial summaries, growth narratives, and diligence materials** for sustainability-linked expansion initiatives.
 - Structured farm-to-market partnerships improving asset utilization and lowering cost of goods sold, enhancing EBITDA profile.
 - Evaluated expansion scenarios using downside, base, and upside cases to assess capital risk and return profile.
-

Bilalian Halal Association (Nonprofit) — Los Angeles, CA

Co-Founder | Aug 2013 – 2023

- Co-founded and scaled a national certification organization, overseeing **budgeting, revenue diversification, and financial sustainability strategy**.
 - Developed funding models across **grants, memberships, and partnerships**, improving predictability of cash inflows.
 - Coordinated stakeholder negotiations with farms, manufacturers, and institutions, enhancing network scale and enterprise credibility.
-

Coachella Valley High School — Thermal, CA

Agriculture & Finance Program Lead (CTE) | May 2023 – June 2025

- Managed a closed-loop agricultural operation, tracking **costs, outputs, waste reduction, and operational efficiency metrics**.
 - Secured **\$5MM+ in grant funding**, preparing budgets, financial narratives, and compliance documentation.
 - Partnered with universities, farms, and public agencies on program financing and execution.
-

TECHNICAL SKILLS

Financial Modeling (3-Statement, Cash Flow, Valuation Support, ROI, Scenario Analysis), Valuation Fundamentals, Budgeting & Variance Analysis

Tools: Excel (Advanced) · Google Workspace · Airtable · PowerPoint · Basic Data Reporting & Dashboards

LANGUAGES

Spanish (Working Proficiency) · Arabic (Working Proficiency) · French (Beginning) · Chinese (Beginning)

Interests: Sustainable infrastructure finance, economic history, long-distance running, world cuisine

IB Interview Network

Below is a **bank-realistic map** of where your profile is **strongest vs weakest**, followed by **polished, interview-ready “Why Investment Banking?” and “Why Now?” answers** that are tightly anchored to *your actual resume*. This is written at **Goldman / JPM / Evercore standard**, not generic MBA advice.

PART I — IB GROUP FIT MAP

STRONGEST FIT (PRIORITY TARGETS)

These are the groups where your background is a **clear advantage**, not a hurdle.

1. Infrastructure / Power / Renewables

(Evercore Infrastructure, GS Natural Resources, JPM Energy Transition)

Why you're strong:

- Cash-flow-driven businesses
- Asset-backed revenue frameworks
- Regulatory alignment experience
- ESG + real assets (not abstract tech)

Resume proof points:

- Scenario modeling (downside/base/upside)
- Capital allocation analysis
- Carbon-linked asset monetization
- EBITDA and revenue multiple benchmarking

Interviewer thought:

“This candidate already thinks like an infrastructure banker.”

2. ESG / Sustainable Finance / Energy Transition

(JPM Sustainable Solutions, GS ESG, Citi Sustainability)

Why you're strong:

- ESG framed as **risk, verification, and cash flow**
- MRV systems (banks care deeply about auditability)
- Monetization without speculation

Resume proof points:

- Carbon-backed digital asset framework
- MRV logic
- Institutional ESG reporting standards

Interviewer thought:

“Rare candidate who understands ESG as finance, not ideology.”

3. Consumer / Food & Agribusiness

(GS Consumer Retail, JPM Consumer & Retail, Rabobank IB)

Why you're strong:

- Direct experience in COGS, margins, supply chains
- Unit economics and gross margin optimization
- Comparable company benchmarking

Resume proof points:

- ~80% gross margins
- EBITDA profile improvements
- Comparable valuation analysis

Interviewer thought:

“Operator who understands where the numbers come from.”

SECONDARY FIT (VIAABLE WITH STRONG INTERVIEWING)

4. Industrials (Selective Coverage)

Why viable:

- Operational efficiency
- Capital expenditure analysis
- Cash flow modeling

Risk:

- Less direct heavy manufacturing exposure
-

5. FIG – ESG / Impact Sub-teams Only

Why limited fit:

- ESG overlap works
 - Core bank/insurance modeling less present
-

WEAKEST FIT (AVOID FOR NOW)

These are not impossible, but **resume friction is high**.

✗ Technology (Pure TMT / Software)

- Limited SaaS metrics
- No MRR / churn modeling

✗ Healthcare / Biotech

- No regulatory trial exposure
- No healthcare valuation comps

✗ Sponsors / LevFin (Initial Rounds)

- LBO mechanics not explicit
 - Could pivot later with deal experience
-

PART II — PERFECT INTERVIEW ANSWERS

These are **ready-to-deliver**, not templates.

“WHY INVESTMENT BANKING?”

Primary Answer (60–75 seconds)

“I’m drawn to investment banking because it formalizes what I’ve already been doing in practice — analyzing real businesses through cash flow, capital allocation, and risk.

As a founder, I had to build Excel-based unit economics, multi-year cash flow projections, and downside/base/upside scenarios to decide where capital should go. What I didn’t have was exposure to that work across multiple companies, industries, and transactions.

Investment banking is the environment where that analytical skill set is applied at institutional scale, with disciplined processes, high standards, and direct exposure to how capital is priced and deployed. That’s the training I want.”

Why this works:

- No ego
- No ideology
- Clear analytical motivation

“WHY NOW?”

Primary Answer (45–60 seconds)

“This is the right time because I’ve closed the operator chapter and deliberately repositioned toward finance.

I stepped back from day-to-day operations in 2023, completed advanced coursework in accounting, valuation, and financial modeling, and focused my work on advisory-style analysis — particularly around ESG and infrastructure-linked assets.

I now have both the practical intuition from operating businesses and the technical foundation to contribute immediately as an analyst, while still being early enough in my banking career to fully absorb the training.”

Why this works:

- Explains age without defensiveness
- Shows intention
- Signals commitment

“WHY ESG / INFRASTRUCTURE BANKING?”

(Use only if asked)

“Because ESG and infrastructure finance ultimately come down to durable cash flows, regulatory alignment, and risk management — not narratives.

My experience designing carbon-backed frameworks forced me to think about verification, auditability, and monetization in the same way infrastructure assets are financed. That perspective fits naturally with how banks underwrite long-term, real-asset investments.”

RAPID-FIRE BACKUP (10–15 seconds)

Why IB over entrepreneurship?

“Banking lets me sharpen my analytical skill set across transactions before deciding where to deploy capital long-term.”

Why analyst, not associate?

“I want the technical reps and foundation that analyst training provides.”

FINAL STRATEGIC ADVICE

You should:

- Lead with Infrastructure / ESG groups
- Network with VPs, not just analysts
- Frame age as judgment + discipline

You should avoid:

- Over-selling crypto
 - Talking about activism
 - Applying blindly to Tech / Healthcare groups
-

If you want next, I can:

- Create **bank-specific versions of these answers**
- Build a **30-second cold-email pitch for networking**
- Mock you through a **GS/JPM first-round interview**

Just tell me the next move.

Got it. You're right—your resume is strong and well-tailored for ESG, sustainable finance, infrastructure, and agribusiness roles. The main differentiator now will be **networking, interview execution, and positioning yourself as the solution-provider for these sectors**. Let's break down practical strategies and tools to maximize success. I'll tailor this to your strongest areas.

1. Networking Strategy: ESG / Sustainable Finance & Infrastructure Focus

Goal: Become a recognizable, credible candidate in ESG and infrastructure finance networks.

Tools & Tactics:

- **LinkedIn Optimization & Targeted Outreach:**
 - Connect with ESG-focused investment bankers, sustainability analysts, infrastructure PE/VC professionals, and impact investing leads.
 - When connecting, send a **customized note** highlighting: your ESG/renewable energy experience, specific projects (Simply Bee Farms carbon-backed tokens, MRV systems), and interest in sustainable finance.
 - **Informational Interviews:**
 - Aim for **15–20 min chats** with professionals at banks/IBs, ESG advisory firms, or climate finance funds.
 - Ask about current ESG deal flow, key valuation challenges in carbon or renewable projects, and trends in climate-linked infrastructure investment.
 - End by asking for a referral or introduction when appropriate.
 - **Industry Groups & Events:**
 - Join networks like **PRI (Principles for Responsible Investment)**, Ceres, GIIN, CFA ESG & Sustainable Finance group, and renewable energy conferences.
 - Attend webinars and panels—**ask insightful questions** publicly to build visibility.
-

2. Interview Preparation & Positioning

Goal: Demonstrate technical credibility + strategic thinking for ESG & infrastructure deals.

Framework:

1. **Sector Expertise**
 - Be able to articulate:
 - **Carbon finance fundamentals:** MRV, pricing, verification mechanisms.
 - **Renewable energy economics:** CAPEX/OPEX, subsidies, PPAs (Power Purchase Agreements), project finance structuring.
 - **Sustainable infrastructure valuation:** Adjusted EBITDA, discounted cash flows with ESG-adjusted risk premiums.
 - Prepare **mini case studies** from your experience (Simply Bee Farms MRV/tokenization, Prism Juicery farm-to-market expansions).
 2. **Technical Fluency**
 - Be ready for **financial modeling tests**: discounted cash flow, sensitivity analysis, scenario modeling for ESG or infrastructure projects.
 - Know **how ESG metrics impact valuation**: e.g., risk-adjusted discount rates, revenue from carbon credits, or sustainability-linked KPIs.
 3. **Storytelling & Differentiation**
 - Use the **STAR method**: Situation, Task, Action, Result.
 - Highlight:
 - Initiative: Designed carbon-backed digital assets.
 - Impact: Enabled recurring revenue + ESG alignment.
 - Uniqueness: Deep understanding of both agribusiness operations and ESG finance.
-

3. Deal-Flow Familiarity & Knowledge Tools

Goal: Speak confidently about deals in ESG, energy transition, and infrastructure.

Tools / Resources:

- **Databases:** PitchBook, Preqin, Bloomberg ESG, Refinitiv Eikon (for deal comps, ESG scores, transaction multiples).
 - **Reports & Whitepapers:** McKinsey “Net Zero Banking”, BNEF (Bloomberg New Energy Finance), IEA clean energy reports.
 - **ESG Frameworks:** Understand **SASB, TCFD, EU Taxonomy**—be ready to discuss how financial analysis intersects with compliance/reporting.
-

4. Networking + Interview Execution Workflow

1. **Identify Target Firms / Roles:** ESG investment banking desks, sustainable infrastructure funds, climate finance advisory.
2. **Map Contacts:** Use LinkedIn, alumni networks (UC Davis, UC Santa Cruz), ESG-focused groups.
3. **Engage Strategically:**
 - Informational interviews → LinkedIn follow-up → periodic updates about your projects.
4. **Prepare Talking Points:**
 - Mini-cases on MRV, carbon credit modeling, renewable energy finance.
 - ESG KPIs that influence investment decisions.
5. **Rehearse Interviews:**
 - Technical modeling test → walk interviewer through step-by-step reasoning.

- Behavioral → STAR stories emphasizing ESG + operational rigor.
-

5. Optional High-Leverage Moves

- **Publish a short LinkedIn/Medium article:** “Designing Carbon-Backed Digital Assets for ESG Finance” → positions you as thought-leader.
 - **Seek a micro-IB / advisory project** in ESG or infrastructure finance before graduation → a strong conversation starter for full IB roles.
 - **Leverage your unique agribusiness + ESG background** as a bridge between “traditional IB” and “emerging climate-linked assets.”
-

If you want, I can create a **90-day “Networking + Interview Playbook”** that maps out: **who to reach, how to reach them, conversation scripts, follow-up sequences, and prep drills** tailored for ESG, infrastructure, and agribusiness deals. It would essentially maximize your probability of getting interviews **and converting them into offers**.

Do you want me to build that playbook?

Hiring Manager

Digital Capital Advisors

New York, NY

Dear Hiring Manager,

I am writing to express my strong interest in the 2026 Technology Investment Banking Analyst position at Digital Capital Advisors. As an MBA candidate at UC Davis with a focus on Food & Agribusiness Finance, combined with hands-on entrepreneurial experience leading capital-intensive operations, I am well-prepared to contribute to DCA's mission of advising innovative digital media and technology companies.

Through my leadership of Simply Bee Farms and Prism Organic Juicery, I have managed complex financial planning, executed multi-million-dollar operational initiatives, and built models to forecast profitability and capital requirements. This experience, alongside my background in sales and investment analysis, has honed my financial modeling, valuation, and business development skills—capabilities directly aligned with DCA's focus on cross-border M&A and private placements.

What excites me about Digital Capital Advisors is your entrepreneurial, founder-driven culture and your specialization in technology and digital media. I am particularly drawn to the opportunity to work closely with senior bankers on transformative transactions, leveraging my analytical rigor and strategic mindset to support deal execution and client advisory. I thrive in fast-paced environments where attention to detail, initiative, and teamwork are essential, and I am eager to bring this energy to DCA's collaborative team.

I would welcome the opportunity to discuss how my combination of analytical skill, operational leadership, and entrepreneurial experience can contribute to DCA's continued success. Thank you for your time and consideration.

Sincerely,
Ata Nabawi

Hiring Manager

Asian Americans in Public Finance
San Francisco, CA

Dear Hiring Manager,

I am writing to express my strong interest in the 2027 Public Finance Analyst Internship with Asian Americans in Public Finance. As an MBA candidate at UC Davis with a focus on finance and hands-on entrepreneurial experience in capital-intensive operations, I am eager to apply my analytical skills and operational expertise to public finance initiatives that support communities and drive impactful outcomes.

Leading Simply Bee Farms and Prism Organic Juicery, I have managed multi-year financial planning, executed projects with significant capital commitments, and developed financial models to forecast revenue, cash flow, and investment performance. These experiences have honed my quantitative and analytical abilities, attention to detail, and project management skills—capabilities directly applicable to analyzing municipal finance, debt issuance, and infrastructure projects in a public finance setting.

I am particularly inspired by AAPF's mission to empower Asian Americans in public finance and promote community development. The opportunity to gain exposure to public sector finance while contributing to projects that improve local services aligns with my professional interests and my commitment to socially responsible finance. I am confident that my combination of analytical rigor, entrepreneurial experience, and leadership will allow me to make meaningful contributions to your summer program.

Thank you for your consideration. I would welcome the opportunity to discuss how my background and skills can support AAPF's mission and contribute to your team's success.

Sincerely,
Ata Nabawi

Hiring Manager

Goldman Sachs

New York, NY

Dear Hiring Manager,

I am excited to apply for the 2026 Summer Analyst position at Goldman Sachs. As an MBA candidate at UC Davis with a focus on finance and hands-on experience leading entrepreneurial, capital-intensive operations, I am eager to leverage my analytical rigor, modeling expertise, and problem-solving skills to contribute to your quantitative strategies team.

Through my leadership of Simply Bee Farms and Prism Organic Juicery, I have developed and executed complex financial models, forecasting multi-year revenue, cash flows, and capital allocation scenarios. Managing these operations required high proficiency in data analysis, strategic decision-making under uncertainty, and integrating quantitative insights into actionable business strategies—skills that directly translate to constructing models that drive investment decisions and risk management solutions in a fast-paced quantitative environment.

Goldman Sachs' emphasis on innovation, analytical excellence, and strategic advisory aligns closely with my passion for applying quantitative methods to solve real-world financial problems. I thrive in collaborative, high-pressure environments where attention to detail, initiative, and a data-driven mindset are paramount. I am eager to contribute my entrepreneurial perspective, technical skills, and strong quantitative foundation to support the firm's mission of delivering superior insights and solutions to clients.

Thank you for considering my application. I would welcome the opportunity to discuss how my background and skills can contribute to the success of Goldman Sachs' quantitative strategies team.

Sincerely,
Ata Nabawi

amnabawi@ucdavis.edu | (714) 305-7357

Dear Hiring Committee,

I am writing to express my interest in internship opportunities at JPMorgan Chase & Co. I am pursuing a Master of Business Administration with a concentration in Food and Agribusiness Finance and am seeking to apply my analytical, strategic, and execution-oriented skill set in a demanding, high-performance financial environment.

My background combines rigorous financial training with real-world experience evaluating capital allocation, operating performance, and long-term value creation across complex businesses. I have developed strong foundations in financial accounting, corporate finance, and valuation, complemented by hands-on exposure to business modeling, market analysis, and strategic decision-making. I am particularly drawn to JPMorgan for its leadership across global markets, disciplined risk management culture, and ability to deploy capital at scale across traditional and emerging sectors.

In parallel with my academic training, I have worked closely with operating businesses and mission-driven organizations, requiring me to analyze financial performance, assess growth opportunities, and translate quantitative insights into actionable recommendations. This experience has strengthened my ability to think critically under uncertainty, communicate clearly with diverse stakeholders, and execute with precision—skills directly applicable to investment banking, quantitative strategy, and related analytical roles.

I am especially motivated by JPMorgan's role in financing infrastructure, energy transition, and sustainable growth while maintaining institutional-grade standards of rigor and accountability. The firm's ability to integrate deep financial expertise with long-term strategic thinking aligns closely with my professional interests and career trajectory.

I would welcome the opportunity to contribute my work ethic, analytical discipline, and intellectual curiosity to JPMorgan Chase & Co. Thank you for your time and consideration.

Sincerely,
Ata Nabawi

Waggoner CL

Dear Hiring Manager,

I am writing to apply for the **2026 Full-Time Investment Analyst** position at **Waggoner Financial**. I am highly motivated by equity research that goes beyond surface-level analysis and focuses on producing differentiated, actionable insights through disciplined fundamental work. This role strongly aligns with both my analytical training and my long-term interest in investment research.

My background combines rigorous financial analysis with real-world business exposure. Through my academic and professional experience, I have developed a strong foundation in financial statements, valuation, industry analysis, and market research. I am comfortable synthesizing large amounts of information into clear investment theses and supporting conclusions with data-driven reasoning. I am particularly effective when working alongside senior professionals, where I can contribute detailed analysis while continuing to sharpen judgment and perspective.

What draws me to Waggoner Financial is your emphasis on **deep company and industry research** and the collaborative nature of your equity research team. I am eager to contribute to the research process—from initial diligence and modeling through written reports and ongoing coverage—while maintaining the intellectual rigor and curiosity required to uncover non-consensus insights.

I bring a strong work ethic, attention to detail, and a genuine interest in markets and businesses. I am confident that my analytical mindset, willingness to learn, and commitment to producing high-quality research would allow me to add value to your team while continuing to grow as an investment professional.

Thank you for your time and consideration. I would welcome the opportunity to further discuss my candidacy and interest in Waggoner Financial.

Sincerely,
Ata Nabawi

Clavius CL

Dear Hiring Manager,

I am writing to apply for the **Financial Planning Analyst** position at **Clavius Wealth Management and Insurance Services**. I am drawn to this opportunity because it combines rigorous financial analysis with direct exposure to client-centric wealth planning, while offering a clear pathway toward an Advisor role through the CFP® designation.

My background includes graduate-level business and finance training, along with hands-on experience in financial analysis, client-facing work, and strategic decision-making. I am comfortable working with financial statements, cash flow analysis, and long-term planning considerations, and I take pride in translating complex financial concepts into clear, actionable guidance. I bring a strong work ethic, attention to detail, and a proactive mindset—qualities essential for success in a fast-growing advisory environment.

What particularly excites me about Clavius is the firm's emphasis on **professional development and long-term career progression**. The structured two-year program, paired with mentorship and support toward the CFP® designation, aligns directly with my goal of building a career as a trusted financial advisor. I am motivated not only by analytical rigor, but also by the responsibility of helping individuals and families make sound financial decisions aligned with their long-term objectives.

I thrive in collaborative settings and am eager to contribute to both the analytical and client service aspects of the role—supporting senior advisors, preparing planning materials, and continuously improving the quality of advice delivered to clients. I am confident that my analytical foundation, communication skills, and commitment to growth would allow me to add value to your team while progressing toward advisory responsibilities.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my background and career goals align with Clavius Wealth Management and Insurance Services.

Sincerely,
Ata Nabawi

Richtech CL

Dear Hiring Manager,

I am writing to apply for the **Corporate Development & Research Associate** position at **Richtech**. This role strongly aligns with my background and interests at the intersection of financial analysis, strategic research, and deal execution, and I am particularly drawn to the opportunity to work directly within the CFO's office on high-impact corporate initiatives.

My experience has equipped me with a strong analytical foundation and the ability to support complex strategic decisions. I am comfortable conducting deep industry and competitor research, building financial models to evaluate partnerships and investment opportunities, and synthesizing findings into clear, decision-ready materials such as investment memos and presentations. I have also worked with legal and compliance concepts in a business context, supporting diligence, contract review, and corporate structuring efforts in coordination with cross-functional teams and external advisors.

What excites me most about this opportunity is Richtech's need for a versatile, detail-oriented professional who can move fluidly between research, strategy, and execution. I thrive in environments where intellectual rigor is paired with real accountability—where analysis must ultimately support action. I am confident supporting senior leadership in high-level discussions by providing well-researched insights, structured financial analysis, and clear communication.

I bring a proactive mindset, strong organizational skills, and a genuine curiosity about businesses and markets. I am eager to grow within a dynamic corporate environment while contributing meaningfully to Richtech's strategic growth initiatives, partnerships, and long-term value creation.

Thank you for your time and consideration. I would welcome the opportunity to further discuss how my background and skill set could support the CFO's office and the broader corporate development function at Richtech.

Sincerely,
Ata Nabawi

Osborne Partners CL

Dear Hiring Manager,

I am writing to apply for the **Associate Investment Analyst** position at **Osborne Partners Capital Management**. I am drawn to this opportunity because it combines rigorous, active investment management with a culture that values discipline, teamwork, and long-term thinking—qualities I believe are essential to sustained success in asset management.

I have a strong passion for investing and a genuine interest in understanding how securities behave across market cycles. My background has provided me with a solid foundation in financial analysis, markets, and portfolio construction, along with hands-on experience working with data, financial statements, and investment research. I am comfortable learning new systems quickly and take pride in precision, attention to detail, and reliability—especially in environments where accuracy and process matter.

What particularly attracts me to Osborne Partners is the opportunity to work alongside an experienced team of CFAs managing multi-asset class portfolios of individual securities. I am eager to deepen my expertise in **fixed income**, contribute to research efforts, support trading and portfolio rebalancing, and stay continuously informed on portfolio holdings and market developments. I value collaborative research discussions and believe that consistent preparation and intellectual curiosity are critical to adding value as an analyst.

I bring a strong work ethic, a modest but competitive mindset, and a long-term commitment to developing as an investment professional. I fully understand and respect the expectation to pursue the **CFA Charter**, and I am prepared to begin the program and dedicate myself to earning the designation within the expected timeframe.

Thank you for considering my application. I would welcome the opportunity to further discuss how my interests, skills, and work ethic align with the standards and mission of Osborne Partners Capital Management.

Sincerely,
Ata Nabawi

Digital4Good CL

Dear Hiring Committee,

I am writing to apply for the **Finance & Accounting Lead Intern** position with **Digital4Good + #ICANHELP**. I am deeply drawn to this opportunity because it combines financial stewardship, team leadership, and mission-driven impact in a digital space where responsible guidance and structure are critically needed.

My background includes graduate-level business and finance training, hands-on experience with financial analysis and accounting fundamentals, and a strong interest in using finance as a tool to support mission execution and organizational sustainability. I am comfortable maintaining accurate financial records, supporting budgeting and forecasting, and ensuring that financial information is communicated clearly to both leadership and operational teams. I approach financial management not as a back-office function, but as a strategic enabler of impact.

This role is particularly compelling because of its **leadership component**. I have experience coordinating teams, tracking deliverables, and keeping projects moving forward through clear communication and accountability. I am organized, detail-oriented, and proactive in identifying issues before they become problems. I value consistent check-ins, transparent workflows, and strong collaboration—especially in remote environments where clarity and follow-through matter most.

I strongly align with Digital4Good's belief that students are part of the solution and that thoughtful systems can empower positive change at scale. I am excited by the opportunity to support the Leadership Team and Board with financial insights, contribute to budget planning, and help build processes that allow creative and educational initiatives to thrive responsibly.

I would welcome the opportunity to contribute my skills, work ethic, and commitment to Digital4Good's mission while continuing to grow professionally under the mentorship of your finance and leadership team. Thank you for your time and consideration.

Sincerely,
Ata Nabawi

Soil Born Farms CL

Dear Ms. Forwood,

I am writing to apply for the **Finance & Administrative Assistant** position at **Soil Born Farms**. I am excited by this opportunity to support a mission-driven organization that integrates sustainable agriculture, education, and community impact, while contributing strong financial and administrative execution.

My background includes business and finance training, along with hands-on experience supporting accounting operations, data accuracy, and day-to-day administrative workflows. I am comfortable with routine accounting activities such as reconciliations, accounts payable and receivable support, invoice processing, and maintaining accurate financial records. I approach these responsibilities with a high level of attention to detail, consistency, and respect for internal controls—especially in nonprofit environments where transparency and stewardship are essential.

I am particularly drawn to this role because it sits at the intersection of **finance, operations, and mission support**. I enjoy keeping systems organized, ensuring information flows smoothly across teams, and supporting leadership with reliable data and follow-through. I am comfortable working with accounting and CRM platforms, reconciling transactions, tracking sales and donations, and supporting reporting that helps teams make informed decisions.

Beyond technical skills, I strongly resonate with Soil Born Farms' emphasis on self-awareness, respect, and collective responsibility. I work well in collaborative environments, communicate clearly, and take initiative to keep operations running efficiently. I am also comfortable handling sensitive information with discretion and professionalism, whether related to staff, donors, or financial records.

I would welcome the opportunity to contribute my skills, work ethic, and commitment to supporting Soil Born Farms' operations and long-term sustainability. Thank you for your time and consideration. I look forward to the possibility of discussing how I can support your Finance & Administration team.

Sincerely,
Ata Nabawi

1 Plastic Life CL

Dear Hiring Manager,

I am writing to apply for the **CRM & Business Development Internship** with **1 Plastic Life**. I am strongly aligned with your mission to reduce plastic pollution through student-led recycling programs, workforce development, and innovative reuse of recycled materials, and I am excited about the opportunity to support your outreach and growth efforts.

My background includes business and finance training, client-facing experience, and hands-on work with structured outreach and data tracking. I am comfortable using CRM systems or spreadsheets to manage leads, document follow-ups, and ensure that outreach efforts are organized, consistent, and effective. I take pride in clear, professional communication and enjoy translating an organization's mission and services into concise, compelling messages for schools, event organizers, and business partners.

What draws me to this role is the opportunity to combine **sustainability, nonprofit impact, and business development**. I am particularly interested in how recycling programs are positioned to institutions and how recycled materials can be repurposed into valuable products for clients. I enjoy working closely with leadership to refine messaging and outreach strategy and am proactive in identifying ways to improve response rates and engagement.

I bring strong attention to detail, reliability, and a willingness to engage directly with external stakeholders through email, calls, and virtual meetings. I am comfortable working remotely, managing my time independently, and maintaining accurate records to support the broader goals of the organization.

Thank you for your time and consideration. I would welcome the opportunity to contribute my skills and enthusiasm to 1 Plastic Life while gaining hands-on experience in nonprofit business development and sustainability-focused outreach.

Sincerely,
Ata Nabawi

Dyneti Technologies CL

Dear Hiring Team,

I am writing to apply for the **Business Development and Go-To-Market Intern** position at **Dyneti Technologies**. I am excited by Dyneti's mission to make digital payments more secure and frictionless, and by the opportunity to work directly with the CEO on customer acquisition and go-to-market execution in a fast-growing, venture-backed startup.

My background combines business training with hands-on experience in outreach, market research, and client-facing execution. I am comfortable identifying and testing acquisition channels, supporting sales outreach, and engaging with prospective customers as an initial point of contact. I enjoy operating in fast-paced environments where experimentation, iteration, and direct accountability drive results.

What particularly draws me to Dyneti is the real-world scale and impact of DyScan. Working on a product that already serves Fortune 100 companies and high-growth tech firms, while still being in a stage where go-to-market strategy can materially shape growth, is exactly the environment where I thrive. I am eager to contribute to conference and event marketing, outbound and inbound sales efforts, and ongoing account support while learning how a high-performing commercial team operates.

I bring strong communication skills, a proactive mindset, and a willingness to take initiative. I am comfortable learning quickly, wearing multiple hats, and executing with urgency—qualities I believe are essential when working closely with founders and early-stage teams. Most importantly, I am motivated to deliver tangible outcomes, not just analysis.

Thank you for your time and consideration. I would welcome the opportunity to further discuss how I can contribute to Dyneti's go-to-market efforts and continued growth.

Sincerely,
Ata Nabawi

UC Davis Career Center CL

Dear Hiring Committee,

I am writing to apply for the **Career Center Receptionist (STDT 3)** position with the **UC Davis Career Center**. I am excited about the opportunity to support fellow students in career exploration while contributing to a welcoming, organized, and professional front-desk environment.

As a UC Davis student, I strongly value the Career Center's mission to help students build workplace skills and navigate internships, career preparation, and post-graduate opportunities. I am comfortable serving as a first point of contact, providing clear and friendly guidance, and directing students to appropriate resources related to resumes, cover letters, Handshake, interview preparation, and career fairs—while always working within the scope of the role.

My background includes customer-facing and administrative experience that has strengthened my communication, organization, and problem-solving skills. I am confident answering phones, drafting professional email correspondence, assisting with clerical tasks, and maintaining accurate documentation to ensure continuity across teams. I take confidentiality seriously and understand the importance of professionalism and discretion when working with student and alumni information.

I am particularly interested in the outreach and engagement aspects of this role, including workshops, tabling, and events. I enjoy working with diverse student populations and contributing to a positive campus culture. I am also comfortable using common productivity tools such as Microsoft Office and Google Workspace and am eager to deepen my familiarity with the Career Center website and Handshake system.

I am fully available for the required training sessions and am committed to maintaining reliability, professionalism, and a strong service mindset throughout the academic year. Thank you for your time and consideration. I would welcome the opportunity to contribute to the UC Davis Career Center and support students in their professional development.

Sincerely,
Ata Nabawi

Hiring Manager
Kroll

Dear Hiring Manager,

I am writing to express my strong interest in joining Kroll's Mergers & Acquisitions team. As a graduate student in Food & Agribusiness Finance at UC Davis, with hands-on experience in business development, financial modeling, and strategic advisory, I am eager to contribute to Kroll's middle-market M&A practice and support the execution of high-quality transactions.

In my professional experience, I have led financial analysis, valuation modeling, and strategic planning initiatives across entrepreneurial and corporate settings. At Prism Organic Juicery and Simply Bee Farms, I developed financial models, conducted market and competitor analyses, and prepared investor materials that informed critical business decisions. These experiences honed my ability to work across multiple stakeholders, manage complex projects under tight deadlines, and deliver precise, actionable insights—skills directly aligned with Kroll's transaction advisory work.

I am particularly drawn to Kroll's reputation for combining deep industry expertise with superior execution and client service. I am confident my analytical rigor, attention to detail, and collaborative approach would allow me to contribute meaningfully to your M&A engagements, from financial modeling to due diligence and client deliverables. I am also committed to obtaining FINRA Series 79, 63, and 7 certifications to further support Kroll's advisory efforts.

I would welcome the opportunity to discuss how my background and skills can add value to Kroll's Mergers & Acquisitions team. Thank you for your time and consideration.

Sincerely,
Ata Nabawi

If you want, I can also draft a **more aggressive, investment-banking-style version** that emphasizes elite deal execution and high-stakes advisory experience—this can help you stand out for competitive M&A roles. Do you want me to do that?

Evercore
Investment Banking Division
Frankfurt am Main

Dear Hiring Committee,

I am writing to apply for the Q4 2026 Off-Cycle Internship in the Investment Banking Division at Evercore's Frankfurt office. I am currently pursuing a Master of Business Administration at the University of California, Davis, with a concentration in Finance and Valuation, and I am seeking a highly demanding, execution-oriented internship where I can contribute at analyst level to live transactions. Evercore's Frankfurt office, characterized by lean deal teams and direct exposure to complex advisory mandates, represents an ideal environment for this development.

My academic training provides a rigorous foundation in corporate finance, financial accounting, valuation, and financial modeling. I am comfortable analyzing financial statements, building and reviewing valuation models, conducting detailed industry and company research, and preparing transaction materials for senior bankers and clients. I approach all analytical work with a strong emphasis on precision, structure, and efficiency, ensuring outputs meet professional and client-ready standards.

In parallel, my professional experience reflects a consistent record of accountability, discipline, and performance in results-driven environments. I have operated under tight deadlines, managed multiple priorities simultaneously, and delivered high-quality work with limited supervision. These experiences have strengthened my attention to detail, time management, and ability to contribute effectively within small, high-intensity teams—skills directly aligned with the responsibilities of an investment banking analyst.

I am particularly drawn to Evercore due to its culture of intellectual rigor, integrity, and senior-level engagement. The firm's expectation that interns contribute meaningfully from the outset aligns closely with my work ethic and motivation. I am fluent in English and have professional proficiency in Spanish and Arabic, and I am accustomed to working in international, multicultural environments. I am actively committed to further developing my German language skills.

I am confident that my analytical capabilities, professional maturity, and commitment to excellence would allow me to add value to Evercore's Frankfurt team while gaining first-hand exposure to the firm's advisory work. I would welcome the opportunity to further discuss my application.

Yours sincerely,
Ata Nabawi
